

Request for Waiver to NPR 1400.1 NASA Directive Procedural Requirements

<p>Requirement to be Waived: The Office of the Chief Engineer requests a waiver to the following requirement, with regards to the update of NPR 7123.1A: NPR 1400.1E, paragraph 3.7.4.j. Number paragraphs in appendices using the letter of the appendix (e.g., A.1, A.2), excluding appendices containing acronyms and definitions.</p>	
<p>Duration of Waiver: OCE requests this waiver to extend throughout the five years that NPR 7123.1B will be active in the NODIS library or until the "C" revision of the document, whichever comes first.</p>	
<p>Rationale: Appendix C is a self-contained and fairly complex appendix with extensive cross-referencing of sections included in the graphics throughout the long appendix. It is coherent and comprehensive as is. Numbering each of the paragraph would involve working all the graphics in the appendix, and make the appendix out of synch with the many documents that have applied and implemented the graphics in the appendix.</p>	
<p>No conflicts with other requirements have been identified.</p>	
<p>Necessary to Achieve the Underlying Purpose of the Requirement: OCE believes waiving this requirement will better serve the purpose of the appendix. There is little benefit seen to reworking the appendix to the new requirement. Since there are no requirements in the appendix, the value of having uniquely numbered paragraphs goes away. Having to rework the appendix, however, creates confusion in the legacy of the use of that appendix and introduces the possibility of error because of the extensive rework.</p>	
<p>Other Considerations: This request for waiver does not require a waiver to environment, safety, health, or security. It does not increase risk.</p>
