NRW 4200-13

December 18, 2009

Reply to Attn of: Office of Infrastructure

TO: Assistant Administrator, Office of Internal Controls and Management Systems

FROM: Assistant Administrator, Office of Infrastructure

SUBJECT: NASA Procedural Requirement (NPR) 4200.1G, NASA Equipment Management Procedural Requirements

The Office of Infrastructure (OI) is requesting a waiver from the requirement of NPR 1400.1D, Section 2.11.6, which states that the Responsible Office is responsible for requesting a one-time 30 calendar day extension on a suspense date, 10 calendar days prior to the initial suspense date in order to obtain more time to resolve and respond to substantive issues related to the directive. While the Office of Infrastructure was already granted a one-time 30-day extension, another 30 days is needed to ensure that the inclusion of several phrases and references to other NPDs/NPRs by Marshall Space Flight Center (MSFC) will not affect the legal significance of other parts of the document. OI/LMD will use the additional 30-day extension, if granted, to continue work with the Office of the General Counsel to ensure the additions are legally sufficient.

Should you have any questions or need further explanation regarding this request please contact Fatima Johnson, Directives Manager for OI at 202-358-1631.
